

Design Talk: Envisioning the FUTURE of Lights

9 June 2015 (12:30 – 15:45)
Meeting Room 8 (North), Area B

Program highlights:
Preview the future of lights from designer perspectives

Content:

The future of light is filled with imagination

- #Connected lighting, embedded lighting and sustainable lighting
- #Light acts as a form of communication to evoke emotion
- #Design light for people which creates comfort and well-being
- #Simplify of lighting design and reflect with the origin of light – the source of energy
- #Flourish our environment through the richness and texture created by light
- #The value of light is beyond illumination – the transformation on how people interact with light broaden the functions and performance of lighting
- #Implement lights to respond on human proximity and touch – linking up people with surroundings

Agenda:

Worldwide renowned lighting designers share the design concepts and ideas for the future of lights through different perspectives:

2015 Asia Lighting Arts Symposium

9 June 2015 (12:30 – 18:10)

Meeting Room 2, Area B

Theme:

Managing Lighting Projects – From Design to Implementation

Program highlights:

Emphasis on the cooperation and connections between lighting designers with all relevant parties during planning, product selection and installation status.

Content:

Project-based business becomes one of the major drivers for the prosperity in lighting industry. The seminar shall split into 4 major sections highlighting “managing lighting design to implementation”, covering topics on:

#Planning

- Invite city planners or property developers to share their views on how the lighting designers' elements and vision take into account at the planning stage.

#Design

- Invite lighting designer share case studies on lighting projects.

#Production

- Invite lighting designers share their experience on how they select appropriate lighting products to apply for their projects.

#Installation

- Invite system integrators or contractors to presents on how they implement the concepts of lighting designers with lighting products and present the lighting design from concept to reality.

Agenda:

Invite city planners, lighting designers, manufacturers and installers to share their ideas on project- based lighting management

2015 Asia Lighting Arts Symposium

10 June 2015 (09:30 – 18:15)

Meeting Room 2, Area B

Theme:

Lighting Inspiration of Design

Program highlights:

Design Concepts & Case studies

Content:

The symposium covers presentations of three sections and panel of discussions between lighting designers, architects and interior designers, stimulate audiences with inspirations and new ideas on lighting designs, light & space and light & architecture:

#Lighting Design: Case analysis

- The value of lighting design
- Conceptualisation to realisation
- What is the pivotal innovation you are waiting for?

#Light and Space: The integration of light and space

- How lighting affect our impression on space?
- How to change the atmosphere through lighting design?
- How to create different visual effect for space using the methodology of lighting design?

#Light and Architecture: The integration of light and architecture

- What lighting design could perform?
- How lighting designs highlight or advance the green aspect of a building?

Agenda:

Invite lighting designers, architects and interior designers to share their ideas in lighting inspiration

2015 Alighting Summit: Lighting Design

11 June 2015 (09:00 – 17:00)

Meeting Room 1, Area B

Program highlights:

Design case studies

Content:

Discussions highlighting different case studies of lighting application:

#Interior lighting sessions:

- Industrial lighting
- Hotel lighting
- Commercial lighting
- Day lighting

#Exterior lighting sessions

- Architectural lighting
- City lighting

Agenda:

Invite associations, lighting designers and corporations
