1. Polyester satin ribbon snap button tapes are made with the double face polyester satin ribbon. 196 colors of the double face polyester satin ribbons are available with stock. The minimum of color is small. Short production leadtime. 3 sizes of hook and eye tapes are available. Different quantity of snap buttons can be chosen. Tonal color between snap buttons and tape can be offered.

2. Sew on polyester snap button tapes are made with the tapes cut from the polyester fabric. Apart from the traditional dyeing the polyester tapes and snap buttons together in the same color, tonal color between snap buttons and polyester tape is possible now.

3. A new collection of various closures are sprayed with the Chameleon Effect Pigment. Chameleon Effect Pigment is a new advance optically variable pigment based on special chips substrates and coated by multilayer metal oxides coatings according to optical property. Each piece of pigments reflects constantly changing colors under the condition of different viewing angles and light ray incident angles, showing a flop of a special effect, helping products to add dynamic and stunning colors.
