

THE RED EMBROIDERED LACE

As embroidery manufacturer we don't produce French laces but we've found a new technique that allows us to reproduce the lace effect with very thin embroideries.

This is a great advantage for our customer that can finally buy customized lace effect in a very short time (no longer than 4 weeks for production).

THE PALE YELLOW EMBROIDERY LACE ON TULLE BASE

As for the first picture, in the second one we show our lace effect embroidery made on extra light skin color mash.

This type of articles allows our customers not only to purchase a customized lace in the shortest time ever but also to avoid any troubles during the garment problem!

The mesh base in fact, makes it way easier to adjust the fabric to any type of dress model.

QUILTED EFFECT WITH PRECIOUS THREAD

In the latest SS 19 collection we've conceived a new idea of Quilt that is suitable also for Spring/ Summer weather, all made with precious materials like silk organdie, Cotton yarn or Lurex that gives a special shiny feeling to the whole design.

FINGE DESIGN

Being the Fringes a returning trend from the past, our excellent design team reinterpreted them to enhance the beauty of a flourishing garden in the finest embroidery techniques, in order to provide fabrics suitable for everyday life but elegant ladies' dresses.
