

2015 Insight

SIBT is one of the most prestigious building trade shows in Asia and a compulsory event for all international players of the building industry. This year, for the 4th time, EnOcean Alliance will be exhibiting with member companies, and I'm looking forward to a productive exchange with visitors and exhibitors.

For this, the SIBT is the perfect platform, which brings together architects, building planners and owners, manufacturing authorities, contractors and many more industry-related representatives from China and around the world.

Mr Graham Martin, Chairman & CEO, EnOcean Alliance

2015 Intelligent Building & Smart Home Standard Forum Series

EnOcean Technical Forum
23 / 9 / 2015 (15:00 - 17:00)

2014 Review

EnOcean Alliance exhibited with eight member companies demonstrated intelligent energy harvesting wireless automation solutions offering highest installation flexibility and lowest maintenance effort. The alliance joined the group of experts to educate on the possibilities of automation solutions that work without cables and batteries. At the joint EnOcean Alliance booth, the member companies Caleffi, Contemporary Controls, EnOcean, Helvar, SECO, Thermokon, TIANSU and WAGO presented their range of energy harvesting wireless products which intelligently control HVAC, light, security and comfort in buildings and homes.

2014 EnOcean Technical Seminar offered an effective information exchange and networking platform for the industry players. Topics included:

- ~ Energy Harvesting Wireless Solution for Smart Homes and Intelligent Buildings
- ~ Introduce EnOcean Products and Strategy of Sales & Marketing for China
