LonMark International

2015 Insight

SIBT is the most important and most professional international intelligent building and systems exhibition. The best platform for showcasing innovative products and understanding the development trends of the building automation and smart home industry.

LonMark International has committed to provide an open, interoperable standard platform to incorporate the green concept and smart city development by providing tools, resources, and support for members and the industry players.

Mr Eric Sun, Ambassador of LonMark International (China)
