Development ”

Great outlook, convenience and having full functions are the keys for future home theater systems. Audio is way more than merely producing sounds, and future home theater systems will appear in every household. Smart home is stoned in people's life, and turning our home smart is the future trend.

Cinemaster Shanghai Ltd

The AV integration and home entertainment is developing good in China. Smart AV will be widely accepted in families. Stepping forward to the right direction in pace with government policies and market trends, there will be huge opportunities in the industry.

Liaoning Youwang Lighting Ltd Company

SSHT

With the advanced technology development, home theater is becoming more popular among families. Smart home is the key for future. We believe that AV integration and home entertainment will more significant as time goes by.

Elite Screens China Corporation

Elite Screens China Corp.
DarkStar9™ Premium Screen

I think that AV is still at the first stage of development. However, the awareness of AV brands and product demand will increase in the future. The prospects of AV industry is still positive.
