SPRING

向往与自然的同一是人类最深沉的内在愿望,为爱觉醒、谦卑于自然,将人本主义和生态平衡紧密联系;褪去多余的装饰,通过循环经济创建 更具耐久性和实用性的淳真品质,强调服装的实穿性与功能性,以流畅 灵活的思考方式,探寻艺术、技术与科学的边界,带来饱含惊喜感的本

色彩: 这是与自然相关的生态色组,宁静朴素的中性色调占据重要地位,与隐形机能白色调配搭,构建功能主义的美学氛围。象牙色、浅亚麻色,让人感觉舒缓安心,如雾般朦胧的水洗蓝色、灰豆绿色,与烟草色一起使用,蕴含着雅致的舒适品质,轻柔的微蓝色,则增添了一抹澄明的清凉感。

真之物, 打造出更有意义的产品。

面料:超轻质感、干爽表面、自然外观,带来简约舒适的穿着体验;天然纤维、原液着色纤维、再生纤维等环保材质是应用重点;Supima[®]棉、有机羊毛、天丝™等供应链可追溯产品受到偏爱;同时,高仿真化纤仿天然纤维,实现面料服用性能优化;少水及无水染色、高速数码印花等环保工艺赋予面料绿色内涵;结合涂层、覆膜、复合等形式,赋予面料防水透气、吸湿快干、抗皱免烫、抑菌抗菌等性能。

The strong aspiration for the unification with nature is the deepest inner pursuit of mankind. With the worrying heart for the future of the earth, people always maintain awe of nature. It is urgent to find a suitable relationship between humanism and ecological balance. Focus on more durable and practical quality via a circular economy. Emphasize the wearability and functionality of the apparel. Explore the boundaries of art, technology and science based on a new thinking way, which can bring the design of refined imperfection and more meaningful products.

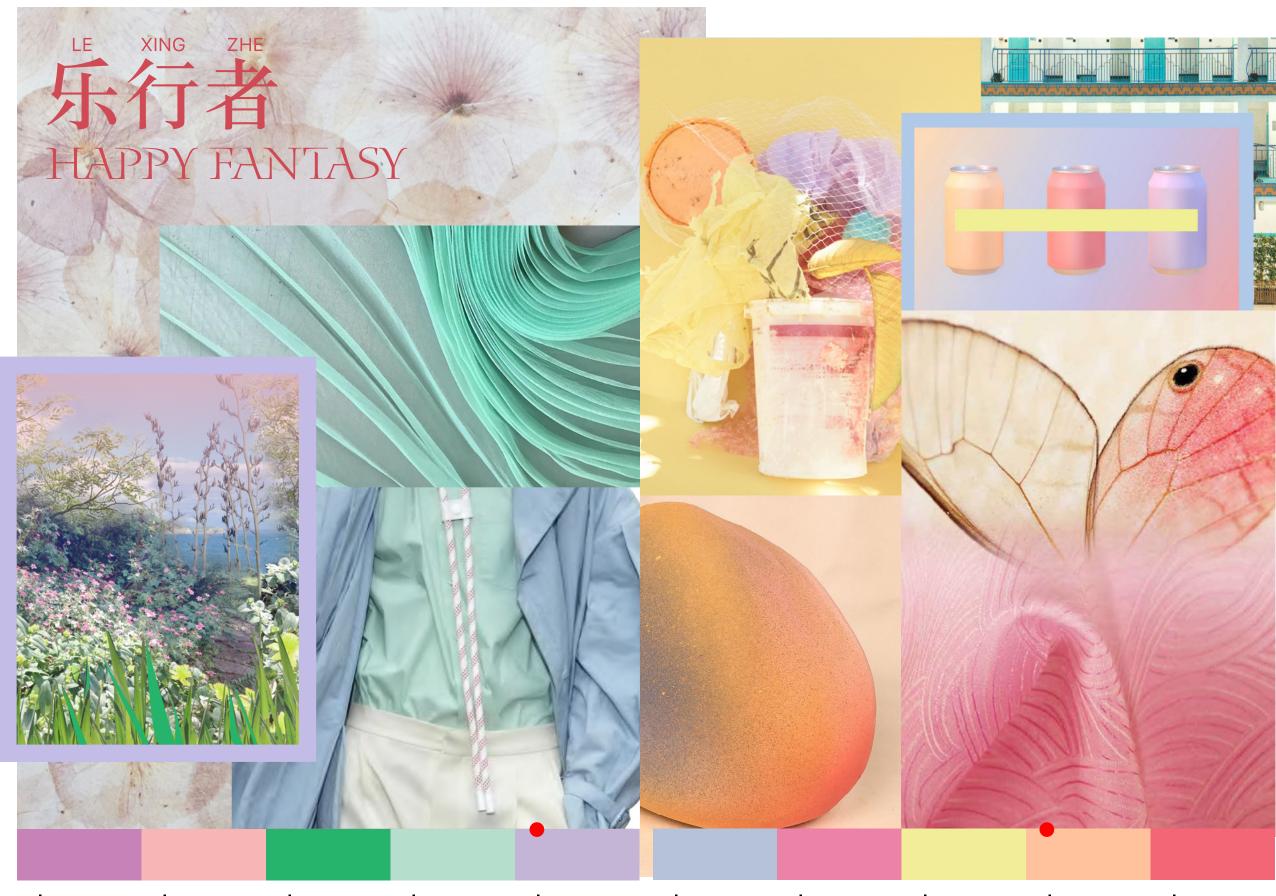

This is a palette of colors related to nature. The quiet neutral colors occupy an important position, and it is matched with the white tone to build an ecological functional style. Whisper white and whitecap gray make people feel soft and soothing. The mix and combination among faded denim, trellis, and biscotti indicates an elegant comfort quality. And bit of blue adds a touch of clarity of cool feeling.

Lightweight, dry materiality, and precious naturalness, bring a simple and comfortable wearing experience. Eco-friendly materials, like natural fibers, solution-dyed fibers, regenerated fibers are the focus. Supima® cotton, organic wool, Tencel™ and other supply chain traceability products are favored. Besides, the imitation-natural fibers fabrics made of chemical fibers can optimize the wearability of fabrics. Eco-friendly processes, i.e., less water dyeing, anhydrous dyeing, and high-speed digital textile printing, empower the sustainable connotation on fabric. Processes like coating, lamination, etc., can make the fabric have a practical performance with breathable and water-repellent, moisture-absorbent and quick-dry, crease-resistant, and antibacterial properties.

The new youth power stimulates the face score economy, and the senses paralyzed by the consumer society in the past have renewed their vitality. Interest prioritization, experience orientation, and the pursuit of people's own taste and appreciation encourage the optimists to explore the possibility of a "new" way of life. Do not drift with the current, try to create a marvelous laboratory about flexible perception in the intertwining of sensibility and adventure, and convey the fresh energy of happiness.

The transgender color palette blends exquisite pastel wax tones and more vivid digitalized colors, indicating hopeful romanticism. The mix and match of pastel lilac, brook green, and violet show a gradient of watercolor effects. Soft apricot ice, elfin yellow, and aurora pink play with transparency in lightweight. The combination of island green, Sunkist coral create a diverse and creative experience.

The combination of the natural material and the artificial material not only present diverse styles, such as drape, slight elasticity, durability and lightweight, but also full of self-pleasant individual expression. Lyocell fiber blended with silk, cupro, or cellulose acetate fiber can bring us a soft but also well-ironed fabric, together with a simple and smooth garment silhouette, can achieve a balance of technology and comfort. High-quality fine-gauge knitted fabrics present casual urban fashion. A rich romantic experience can be expressed by fantastic floral and geometric elements, with various techniques such as jacquard and printing.
